

Problem Solution Fit

Problem-solution fit checks that the solution really addresses a problem users have.

Area	Details
Customer segment	Commuters, students, professionals, travellers and outdoor planners
Problem	Generic or hard-to-interpret weather data and late alerts
Existing alternatives	Standard weather apps and websites that show numbers without guidance
Our solution	AI-driven weather insights that explain the forecast and suggest what to do
Triggers to act	Unexpected rain, heat, travel plans, daily routine
Outcome	Better-prepared users who save time and avoid weather-related problems
