

Proposed Solution

S.No.	Parameter	Description
1	Problem statement	Users get raw weather data but no clear, personalised guidance
2	Idea / solution	An AI weather assistant that combines accurate forecasts with plain-language insights
3	Novelty	Turns weather data into actionable advice such as clothing, travel and safety tips
4	Social impact	Helps people plan safely and reduces weather-related disruption
5	Business model	Free core app with optional premium alerts and insights
6	Scalability	Can extend to more regions, languages and integrations
