

Solution Requirements

Functional Requirements

FR No.	Requirement	Description
FR-1	Location input	User can search a city or use automatic location detection
FR-2	Current weather	Show temperature, humidity, wind and conditions
FR-3	Forecast	Show hourly and multi-day forecast
FR-4	AI insights	Generate a plain-language summary and suggestions using AI
FR-5	Alerts	Warn the user about rain, storms and extreme heat
FR-6	Saved cities	Let the user save and revisit favourite locations

Non-Functional Requirements

NFR No.	Requirement	Description
NFR-1	Usability	Simple interface that is easy to use on mobile and desktop
NFR-2	Performance	Results should load quickly under normal network conditions
NFR-3	Reliability	Show a clear message if the weather service is unavailable
NFR-4	Security	Keep API keys private and avoid storing sensitive user data
NFR-5	Scalability	Design should handle growth in users and locations
NFR-6	Accuracy	Use trusted weather data sources
